ANNUAL REPORT ON TOBACCO STATISTICS, 1945

Prepared by

the

Production and Marketing Administration

- - -

This is the tenth in a series of annual reports on tobacco statistics authorized and requested by Congress on August 27, 1935. The first three are United States Department of Agriculture Statistical Bulletins 58, 63, and 67, and the fourth through the tenth are processed publications. All are obtainable from the Production and Marketing Administration, U. S. Department of Agriculture, Washington 25, D. C.

1. Acreage, yield per acre, production, price per pound, and crop value, total, by classes, by types, and by types within States, 1940-45 - - - - -	5
2. Acreage, yield per acre, production, price per pound, and crop value, by States, 1940-45 - - - - -	13
3. Production in specified countries, 1940-44 - - - - -	16
4. Production of flue-cured in specified countries, 1940-44 - - - - -	17
5. Producers' sales, value, and average price, by types and markets, for leaf sold at auction, crops of 1943 and 1944 - - - - -	18
6. Opening and closing dates, sales floors, and buyers, by types and markets, for leaf sold at auction, crops of 1943 and 1944 - - - - -	23
7. Byproducts diversion programs, fiscal years 1942-44 - - - - -	28
8. Auction sales warehouse charges, in effect 1943-44 season - - - - -	30
9. Schedule of ranges in bids by price groups and types, in effect 1944-45 season - - - - -	31
10. Purchases, loans, and releases, of the Commodity Credit Corporation, as of October 31, 1945 - - - - -	32
11. Total stocks of unstemmed and stemmed leaf owned by dealers and manufacturers, quarterly, 1941-45 - - - - -	33
12. Stocks of leaf, by types as reported and on a converted-weight basis, quarterly, 1941-45 - - - - -	34
13. Conversion factors for adjusting for losses in weight incident to stemming, handling, sweating, and drying all types - - - - -	47
14. Stocks of miscellaneous domestic leaf, by types as reported and on a converted-weight basis, quarterly, 1941-45 - - - - -	48
15. Stocks of foreign-grown cigar, cigarette, and smoking leaf, by types as reported, and on a converted-weight basis, quarterly, 1941-45 - - - - -	50
16. Stocks of leaf, by types and groups of grades, combining unstemmed and stemmed, quarterly, 1941-45 - - - - -	52
17. Stocks of miscellaneous domestic leaf, by types, combining unstemmed and stemmed, quarterly, 1941-45 - - - - -	66
18. Stocks of foreign-grown cigar, cigarette, and smoking leaf, by types and groups of grades, combining unstemmed and stemmed, quarterly, 1941-45 - - - - -	66
19. Stocks of Burley, by groups and qualities, combining unstemmed and stemmed, quarterly, 1940-45 - - - - -	68
20. Production, stocks, supply, disappearance, and price, by types, 1940-45 - - - -	70
21. Per capita consumption of products, 1940-44 - - - - -	72
22. Leaf used in the manufacture of cigars, cigarettes, and tobacco and snuff, 1935-44 - - - - -	73
23. Cigars, cigarettes, chewing, smoking, and snuff manufactured, 1935-44 - - - -	73
24. Products manufactured, by months and classes, 1941-45 - - - - -	74
25. Tax-paid withdrawals of large cigars, by months, 1943-45 - - - - -	75
26. Rates of Federal tax on products, as imposed by the Internal Revenue Acts of 1926 and 1942 - - - - -	79
27. Tax-paid withdrawals of products other than large cigars, by months, 1943-45 -	80
28. Rates of State tax on products, in effect November 1, 1945 - - - - -	82
29. Receipts from Federal taxes on products, 1941-45 - - - - -	85
30. Receipts from State taxes on products, 1941-45 - - - - -	85
31. International trade in leaf, 1940-44 - - - - -	86
32. Exports of leaf to principal importing countries, by types, 1940-45 - - - - -	87
33. Exports of leaf, by types, crop years, 1940-45 - - - - -	90
34. Exports of leaf, by types, calendar years, 1940-45 - - - - -	90
35. Exports and shipments of products to noncontiguous territories, 1940-44 - - - -	91
36. Imports of leaf by countries, and shipments from noncontiguous territories, 1940-44 - - - - -	91
37. Imports of products by countries, and shipments from noncontiguous territories, 1940-44 - - - - -	92
38. Wholesale prices of products, by months and annual average, 1940-45 - - - - -	93
39. Retail prices of products, average in 32 cities, quarterly, 1940-45 - - - - -	94
40. Tariff rates on leaf and products imported into the United States; established by the Tariff Act of 1930, and subsequent changes - - - - -	95
41. Revenue freight originated, leaf, quarterly, 1940-45 - - - - -	97

INTRODUCTION

In the 1944-45 season the largest tobacco crop in history was produced. It sold at a record level average price, and brought to growers the greatest crop income ever received. The flue-cured and Burley crops were sold subject to allocations and maximum prices. Ceiling prices were also applicable to Maryland purchases of the 1944 crop. Figures on tax-paid withdrawals of cigarettes showed a decrease for the fiscal year ended June 30, 1945, but tax-paid withdrawals of the other tobacco products were somewhat higher than those of the year before.

Total production of the 1944 crop was 1,956 million pounds and exceeded 1943 figures by 550 million; the general average price per pound, topping last year's high by 1.2 cents, was 41.7 cents; and the value of the crop, 816 million dollars, exceeded last year's record returns by 246 million dollars.

The 1944 crop of flue-cured tobacco totaled 1,090 million pounds, and was, with the exception of the crop of 1939, the largest in history. The average price per pound of 42.4 was 2.2 cents above the previous year's level and was exceeded only by the 1919 average. Returns to growers, reaching a level far above the value of any previous crop, were reported at 462.5 million dollars.

For the third consecutive year, prices of flue-cured were controlled by Office of Price Administration regulation. This regulation provided that the weighted average purchase price paid by any buyer should not exceed \$39 per hundred pounds for untied leaf, \$43.50 for tied leaf, and \$5 for farm scrap, and was essentially the same as that of the previous year except for some advance in prices.

A War Food Administration allocation order, restricting purchases of 1944-crop flue-cured tobacco by dealers and manufacturers, provided (as amended) that manufacturers might acquire up to 102.5 percent of the quantity (including scrap) used by them for manufacturing purposes from July 1, 1943, through June 30, 1944, and that dealers might purchase from producers or at auction for their own account up to 147 percent of the quantity originally allocated to them under the previous year's order. This was the second flue-cured crop covered by a distribution order.

The Burley crop of 1944 was by far the largest in the history of the type. Production totaled 591.5 million pounds, 200 million larger than that of the 1943 crop, and over 167 million above the previously established record-high production. The general average price of 44.0 cents per pound was 1.6 cents below the record-high level of the year before. Value to growers, reported at 260 million dollars, was the highest ever recorded.

As in the case of flue-cured, Federal regulations controlling distribution and prices were in effect on the 1944 crop of Burley tobacco. By Office of Price Administration regulation, ceiling prices by grades were established for the 1944 crop at the same levels as had been applicable to the 1943 crop. Under a War Food Administration allocation order (as amended) manufacturers were permitted to buy up to 120 percent of the amount of Burley they used for the 12-month period ended September 30, 1944, and dealers were permitted to buy 120 percent of the amount of Burley allocated to them from the 1943 crop. This was the third Burley crop subject to maximum prices and allocations.

Production of Maryland tobacco reached an all-time high in the 1944 season when over 38 million pounds were grown. The average price of 55.5 cents per pound represented an increase of 10.2 cents over the 1943 price, but fell short by 1 cent of reaching 1942's record high. Office of Price Administration regulation, which fixed a ceiling price of \$57 per hundred pounds on all sales, was in effect on the 1944 crop of Maryland tobacco.

Fire-cured tobacco of the 1944 crop, reported at 64 million pounds, showed a slight decrease in volume from the previous year, bringing this class to a new low in production. However, the 1944-crop of the dark air-cured types, totaling 44.5 million pounds, showed a substantial increase over the near record low figure of 30.0 million pounds produced in 1943. The fire-cured general average of 24.5 cents per pound was about 1 cent above the 1943 price, and although the dark air-cured average of 23.3 cents was nearly 4 cents below that of the previous year, it was still substantially higher than any price received before 1943.

Production of all types of cigar tobacco in 1944 totaled 128 million pounds, about 19 million pounds above 1943 production, and the average, reported at 36.0 cents per pound, was 1.8 cents below the all-time high at which the 1943 cigar-tobacco crop sold. As in the previous year, maximum prices by grades were fixed by the Office of Price Administration on nearly all types of domestic cigar-leaf tobacco, and future-contract purchases of nearly all cigar-filler and cigar-binder types were restricted by War Food Administration freeze order. Type 56 was not affected by either order.

The Commodity Credit Corporation, from June 1936 to October 1945, had made purchases of 1,313 million pounds of tobacco, redried weight, and had made loans on an additional 216 million pounds (table 10). This latter figure includes collateral taken over from the Reconstruction Finance Corporation in June 1936, when activities on tobacco were transferred to the Commodity Credit Corporation. Of the total amount acquired, 1,328 million pounds were flue-cured, of which 140 million was of the 1945 crop; 171 million, dark types; 30 million, Burley; about 900 thousand, cigar-leaf; and 90 thousand, Perique.

Indicated domestic consumption of cigarettes, based on tax-paid withdrawals, totaled 239 billion for the year ended June 30, 1945 (table 27), a decrease of $7\frac{1}{2}$ percent from the record-high withdrawals for the preceding fiscal year. Revenue stamps sold during the first 10 months of the fiscal year indicated decreases in consumption as compared with the same months in the previous year, but May and June withdrawals brought indicated consumption above figures for those two months the year before, and the highest ever recorded for those months.

Tax-paid withdrawals of cigars for the year ended June 30, 1945, were 4,893 million (table 25), only slightly above those for 1943-44, which were near record-low. During the first half of the fiscal year, monthly consumption was indicated as generally lower than for the previous year, but from January to June withdrawals increased over the corresponding month a year earlier.

Tax-paid withdrawals of manufactured tobacco, which consist of the chewing and smoking products, indicated a consumption of 275 million pounds for the year ended June 30, 1945 (table 27). This represents an increase of 10 percent above the record-low consumption of the previous year for all these products combined. Reports of manufacturers show that, with the exception of fine-cut chewing (representing only 3 percent of the total chewing manufactured), increases are indicated in all the separate products making up this group (table 24). Increases were small for the chewing tobacco products, but manufacture of smoking tobacco increased 19 percent over 1943-44, when manufacturers reported production at the lowest point since early in the century.

Sales of revenue stamps for snuff, during the year ended June 30, 1945, covered over 43 million pounds (table 27), an increase of 0.6 percent over the year before and record-high for this product.

Data on tax-paid withdrawals are not an accurate indication of the volume of tobacco products manufactured and consumed. Large quantities were removed from factories and warehouses without payment of tax. These tobacco products were destined to fill military requirements abroad and were for other disposition, including Department of Justice purchases for prisoners of war, products bought for Federal and State penal institutions, special Red Cross purchases, and purchases made by other Government agencies.

Changes in the 1945 Annual Report on Tobacco Statistics: A new table has been added to this report which presents statistics for the separate auction markets on opening and closing dates, marketing days, sales floors, and buyers. Data on exports and imports, which have not been available for publication during the war years, are included again in this issue. The byproducts diversion programs for the 3 fiscal years beginning July 1941 and ending June 1944 are summarized in this report. No diversion program has been in effect since that time. The table on rates of city tax has been omitted because current data were not available at time of publication. As there had been no changes in duties on tobacco since the publication of the last annual report, the table on tariff rates is included exactly as published last year. Also, no data are included on foreign import duties, as there have been no changes in tariff rates by the principal importing countries, and only minor changes by any importing country, since the last report was released. For the current tariff rates that are in effect in the principal countries, refer to the Annual Reports on Tobacco Statistics as follows: Belgium, China, Germany, Netherlands, Norway, France, Italy, Spain, Denmark, Poland, Japan, and Sweden - 1939 report; British Guiana, British West Africa, and Canada - 1940 report; Australia and Switzerland - 1941 report; Eire (Ireland) - 1942 report; United Kingdom - 1943 report; Portugal and Egypt - 1944 report.

BRIEF CLASSIFICATION OF LEAF TOBACCO

(Covering classes, types, and groups)

CLASS 1, FLUE-CURED TYPES

Type 11: Old Belt flue-cured; produced in the Piedmont sections of Virginia and North Carolina.

Type 12: Eastern North Carolina flue-cured; produced in the coastal sections of North Carolina, north of the South River.

Type 13: South Carolina flue-cured; produced in the coastal sections of South Carolina and the southeastern counties of North Carolina, south of the South River.

Type 14: Georgia and Florida flue-cured; produced in southern Georgia and northern Florida.

Groups applicable to Types 11, 12, 13, and 14:

A, wrappers. B, leaf and smoking leaf.
C, cutters. X, lugs and primings. S, scrap.
N, nondescript.

CLASS 2, FIRE-CURED TYPES

Type 21: Virginia fire-cured; produced in the Piedmont and mountain sections of Virginia.

Type 22: Tennessee-Kentucky fire-cured, eastern district, Clarksville, Springfield, and Hopkinsville; produced in a section east of the Tennessee River, in southern Kentucky and northern Tennessee.

Type 23: Kentucky-Tennessee fire-cured, western district, Mayfield, Murray, and Paducah; produced in a section between the Tennessee, Ohio, and Mississippi Rivers in western Kentucky and northwestern Tennessee.

Type 24: Henderson Stemming or Northern fire-cured; produced in Webster, Hopkins, McLean, Union, and Henderson Counties of Kentucky.

Groups applicable to Types 21, 22, 23, and 24:

A, wrappers. B, heavy leaf. C, thin leaf.
X, lugs. S, scrap. N, nondescript.

CLASS 3, AIR-CURED TYPES

Type 31: Burley; produced in Kentucky, Tennessee, Ohio, Indiana, West Virginia, Virginia, North Carolina, and Missouri.

Groups applicable to Type 31:

A, wrappers. B, bright leaf, red leaf, and tips. C, lugs and cutters. X, trash and flyings. S, scrap. N, nondescript.

Type 32: Southern Maryland; produced in five counties of southern Maryland - Prince Georges, Anne Arundel, Calvert, Charles, and St. Marys.

Groups applicable to Type 32:

B, heavy leaf or dull crop. C, thin leaf or bright crop. X, seconds and ground leaves.
S, scrap. N, nondescript.

Type 35: One Sucker; produced in north-central Tennessee and south-central Kentucky.

Type 36: Green River; produced in the northern part of Kentucky in the territory adjacent to Owensboro and Henderson.

Type 37: Virginia sun-cured; produced in central Virginia, north of the James River.

Groups applicable to Types 35, 36, and 37:

A, wrappers. B, heavy leaf. C, thin leaf.
X, lugs. S, scrap. N, nondescript.

CLASS 4, CIGAR-FILLER TYPES

Type 41: Pennsylvania Seedleaf; produced in Lancaster County, Pa., and the adjoining counties.

Groups applicable to Type 41:

B, binders or tops. C, fillers (farm wrappers).
X, stemming grades. Y, farm fillers or ground leaves. S, scrap. N, nondescript.

Type 42: Gebhardt; produced in the Miami Valley section of Ohio and extending into Indiana.

Type 43: Zimmer; produced in the Miami Valley section of Ohio and extending into Indiana.

Type 44: Dutch; produced in the Miami Valley section of Ohio.

Groups applicable to Types 42, 43, and 44:

C, fillers (farm wrappers). X, stemming grades.
Y, farm fillers or ground leaves. S, scrap.
N, nondescript.

Type 46: Puerto Rican sun-grown (including primed (Deshojado) and stalk-cut (Mata)); produced on the Island of Puerto Rico.

Groups applicable to Type 46:

C, superior (tripas, medios, coronas, etc.).
X, inferior (pie inferior, tripa inferior, pajizas, rezagos, etc.). Y, defectuoso (boliche, sentido, cacho duro, amarillo, salcochado, etc.).
S, scrap (pedazos and picadura). N, nondescript (averiado and mohoso).

CLASS 5, CIGAR-BINDER TYPES

Type 51: Connecticut Broadleaf; produced in the Connecticut Valley sections of Connecticut and Massachusetts.

Type 52: Connecticut Havana Seed; produced in the Connecticut and Housatonic Valley sections of Connecticut and Massachusetts.

Type 53: New York and Pennsylvania Havana Seed; produced in the Big Flats and Onondaga sections of New York, and extending into Pennsylvania.

Groups applicable to Types 51, 52, and 53:

A, wrappers. B, binders, seconds, and brokes. C, fillers and short darks. X, stemming grades. Y, sand-leaf fillers or ground leaves. S, scrap. N, nondescript.

Type 54: Southern Wisconsin; produced in Wisconsin, south and east of the Wisconsin River.

Type 55: Northern Wisconsin; produced in Wisconsin, north and west of the Wisconsin River, and in eastern Minnesota.

Groups applicable to Types 54 and 55:

B, binders. C, fillers. X, stemming grades. Y, sand-leaf fillers or bottom leaves. S, scrap. N, nondescript.

Type 56: Georgia and Florida sun-grown; produced in southwestern Georgia and north-central Florida.

Groups applicable to Type 56:

B, binders. C, fillers. X, stemming grades. Y, ground leaves. S, scrap. N, nondescript.

CLASS 6, CIGAR-WRAPPER TYPES

Type 61: Connecticut Shade; produced in the Connecticut Valley sections of Connecticut and Massachusetts.

Type 62: Georgia and Florida Shade; produced in southwestern Georgia and north-central Florida.

Groups applicable to Types 61 and 62:

A, wrappers. B, stout wrappers and binders. C, fillers or tips. X, filler brokes. S, scrap. N, nondescript.

MISCELLANEOUS TYPES OF DOMESTIC TOBACCO

Type 71: Eastern Ohio (flue-cured, fire-cured, or air-cured).

Type 72: Louisiana Perique.

Type 73: All domestic types of tobacco not otherwise classified.

FOREIGN TYPES

Type 81: Cuba (Havana)

Type 82: Sumatra and Java

Groups applicable to Types 81 and 82:

A, wrappers. C, fillers. S, scrap.

Type 83: Philippine Islands (Manila).

Groups applicable to Type 83:

C, fillers. S, scrap.

Type 84: All foreign-grown cigar-leaf not otherwise classified.

Type 90: Foreign-grown cigarette and smoking tobacco (Turkish and other).

TOBACCO

AUCTION MARKETS AND PRODUCING AREAS, 1944

(CIGAR LEAF PRODUCING AREAS NOT SHOWN)

1/ The year beginning July corresponds most nearly to the harvesting year. For example, in the Northern Hemisphere, data for 1940 are for crops harvested in summer and fall of 1940. In the Southern Hemisphere, they are for crops harvested in the spring of 1940. For many countries bordering on the Equator, data are for the harvest which started late in 1940 and continued into the early months of 1941. Countries listed in this table produce from 90 to 95 percent of the tobacco of the world.

2/ Preliminary. Figures for earlier years may be revised on basis of later information.

3/ Data not comparable with earlier years.

4/ Burma became independent from British India in April 1937.

5/ Free China.

6/ British India and reporting native states; Burma not included.

Office of Foreign Agricultural Relations. Compiled from official sources, International Institute of Agriculture, and reports of United States consuls, commercial attaches, agricultural attaches, and commodity specialists in foreign countries.

Table 4.-Production of flue-cured tobacco in specified countries, 1940-44 1/

Total reporting countries ..	1,234,781	1,176,432			

1/ Estimated production of other types, by countries, is omitted due to lack of comparable data. Indications of production of other types were published last in Annual Report on Tobacco Statistics, 1938, Stat. Bul. No. 67, pp. 18-20.

2/ The year beginning July includes the harvesting season in both Northern and Southern Hemispheres. In Northern Hemisphere, data for 1940, for example, are for crops harvested in summer and fall of 1940; in Southern Hemisphere, they are for crops harvested in spring of 1941. For many countries bordering on the Equator, harvest started late in 1940 and was completed in early months of 1941.

3/ Preliminary. Data for earlier years may be revised on basis of later information.

4/ Revised data.

5/ Estimated.

Office of Foreign Agricultural Relations. Compiled from official sources, reports of United States consuls, commercial attaches, agricultural attaches, and commodity specialists in foreign countries.

1/ Did not operate in the 1943 season.

2/ In addition to total warehouse auction sales of the 1944 crop, it is estimated that around 9-1/2 million pounds of scrap were sold by growers outside regular auction channels at an average of 4.6 cents per pound. Sales of scrap of the 1943 crop were estimated at 9-1/2 million pounds which sold at an average of 4.0 cents per pound.

3/ Includes Association deliveries at advance prices.

4/ Did not operate in the 1944 season.

5/ Includes country sales.

6/ Gross sales.

7/ Includes Camp Taylor, Ky.

8/ Did not operate for the sale of Burley in the 1943-44 season.

9/ Resales for the 1944 crop amounted to approximately 4.7 percent of gross warehouse sales, and for the 1943 crop, 2.2 percent. For producers' sales by markets for the 1944 crop, see the Light Air-cured Tobacco Market Review, published June 1945. Value and average of total producers' sales for the 1943 crop are estimated.

10/ Sales of Southern Maryland tobacco occur in the year following production. Most of the tobacco sold in the 1944 season, for example, represents the crop produced in 1943. Sales represent a combination of hogshead sales on the Baltimore market and auction sales on the markets of Hughesville, La Plata, Upper Marlboro, and Waldorf. These figures are on the basis of a calendar year.

11/ Did not operate for the sale of dark air-cured in the 1943-44 season.

Compiled from reports of State departments of agriculture; trade reports; records of the Agricultural Adjustment Agency; and data obtained direct from markets and trade sources by field representatives.

1/ Number of days on which sales were held. The regular auction sales week is Monday through Friday, and this marketing period is generally observed on the majority of markets. However, in a few instances, sales are held only 4 days per week; and on markets which share buyers, sales are scheduled for specific days during the week.

2/ Number of sales floors is not necessarily the same as the number of warehouse buildings. In some instances a single warehouse building is operated as more than one sales floor; in other instances, a combination of several warehouse buildings is operated as one sales floor.

3/ Number of sets of buyers was reduced by one on all flue-cured markets where there were 3 or more sets in the 1943-44 season. Longer selling time was granted in compensation.

4/ Did not operate during this season.

5/ This market sells more than one type. In cases where a sales floor handles more than one type, such sales floor is listed under each type. As a result, there is some duplication in the listing of sales floors on these markets. For detail, see The Tobacco Market Reviews for the types involved.

6/ Same set of buyers used for Types 24 and 36 at Madisonville.

7/ Same 2 sets of buyers used for Louisville, Ky., and New Albany, Ind.

8/ Same set of buyers used for Clarksville and Springfield, Tenn., for Burley.

9/ Did not operate for the sale of this type in the 1943-44 season.

10/ Same set of buyers used for Columbia and Mt. Pleasant, Tenn.

11/ Sales of Southern Maryland tobacco occur in the year following production. Data here refer to the selling seasons of 1944 and 1943, and apply to the crops of 1943 and 1942, respectively.

12/ Same 2 sets of buyers used for Franklin, Mayfield, and Russellville, Ky., and Westmoreland, Tenn.

13/ Same set of buyers used for Types 35 and 36 at Hopkinsville.

1/ Under the 1941-42 program for the diversion of not more than 12,000,000 pounds of dark tobaccos, which became effective on December 11, 1941, the Surplus Marketing Administration paid to tobacco marketing associations 1.5 cents per pound for leaf sold to manufacturers of byproducts, provided the associations had advanced to growers on such leaf not less than 5 cents per pound on Types 22, 23, 24, and 36, and not less than 4 cents per pound on Type 35. When the Agricultural Marketing Administration was established on December 13, 1941, that organization took over the activities of the Surplus Marketing Administration. Effective April 10, 1942, the Agricultural Marketing Administration was also authorized to pay to marketing associations a maximum of 5 cents per pound on leaf of Types 22, 23, 24, 35, and 36 provided (1) that the associations had made advances listed on the schedule of grades and values for the various types approved by the Commodity Credit Corporation in the season when marketed, and (2) that for loose-leaf tobacco of the 1941 crop the advances must have been in excess of 4 cents per pound for Type 35 and in excess of 5 cents per pound for the other types. Under the original December 11, 1941, offer, the cost was 1.5 cents per pound for tobaccos eligible and actually diverted. For tobaccos diverted under the April 10, 1942, amendment, the cost is calculated (1) for prized tobaccos as the difference between advances to cooperative associations (including handling, storage, and interest charges) and the prices paid by manufacturers for quantities purchased for use in byproducts, and (2) for loose-leaf tobaccos, the difference between advances by cooperative associations to growers and the prices paid by manufacturers. Under the amendment, sales to byproduct manufacturers were required to be at not less than 3.5 cents per pound for Types 22, 23, 24, and 36, and not less than 2.5 cents per pound for Type 35.

2/ Storage order basis. 3/ Farm-sales-weight basis.

4/ Cost to the Government. Average cost per pound is calculated on actual, not rounded, figures.

5/ Under the 1942-43 Diversion Program, which became effective August 12, 1942, the Secretary of Agriculture authorized the Food Distribution Administration to purchase for byproducts uses fire-cured (Types 21, 22, 23, and 24) and dark air-cured (Types 35 and 36) tobaccos, not to exceed 25,000,000 pounds. Payments were made to manufacturers at a rate equal to the difference between the approved purchase price and 3.5 cents per pound on tobaccos of Types 21, 22, 23, 24, and 36, under a provision that such rate of payment should in no case exceed 7 cents per pound; and at a rate equal to the difference between the approved purchase price and 2.5 cents per pound for tobaccos of all other types, under a provision that such rate of payment should in no case exceed 6 cents per pound. Under an amendment to the original offer, effective April 19, 1943, the Secretary increased the payments which could be made to manufacturers, from the 7-cent maximum for Types 21, 22, 23, 24, and 36, and from the 6-cent maximum for all other types, to a 12.5-cent maximum for all types.

6/ Includes a small amount of Type 24.

7/ Under the 1943-44 Diversion Program, which became effective September 15, 1943, the Secretary of Agriculture authorized the Office of Distribution to purchase for byproducts uses fire-cured (Types 21, 22, 23, and 24), dark air-cured (Types 35 and 36), and other approved types of tobacco, not to exceed 30,000,000 pounds. The original program based payments to nicotine manufacturers on the type of tobacco purchased, but amendments permitted payments on the basis of nicotine content of the leaf, with a provision that such rate of payment should in no case exceed 12.5 cents per pound.

8/ Includes some tobacco of earlier crops.

9/ Totals include storage order of stocks and farm-sales weight of crop of each year of the 3 years in which diversion programs were effective.

NOTE: For Diversion Programs beginning March 1936, and continuing through June 1939, see tables 50-53 in the 1941 Annual Report on Tobacco Statistics. No programs were in effect for 1939-40 and 1940-41.

Table 8.-Auction sales warehouse charges, by States and types 1/

State	Type name	Type : :number:	Auction sales warehouse charges
Florida 2/	Flue-cured	14	For auction fees, 15 cents on all piles of 100 pounds or less, and 25 cents on all piles over 100 pounds. For weighing and handling, 10 cents per pile on all piles of 100 pounds and 10 cents for each additional 100 pounds. For commissions on gross sales of leaf tobacco in said warehouses not to exceed $2\frac{1}{2}$ percent of said gross sales.
Georgia 2/	Flue-cured	14	For auction fees, 15 cents on all piles of 100 pounds or less, and 25 cents on all piles over 100 pounds. For weighing and handling, 10 cents per pile on all piles of 100 pounds and 10 cents for each additional 100 pounds. For commissions on gross sales of leaf tobacco in said warehouses not to exceed $2\frac{1}{2}$ percent of said gross sales.
Indiana	Burley	31	35 cents per 100 pounds and $2\frac{1}{2}$ percent commission.
Kentucky	Burley 3/	31	Lexington: 25 cents per 100 pounds and 3 percent commission (minimum of 75 cents per 100 pounds); Shelbyville, Horse Cave, and Bowling Green: 35 cents per 100 pounds and 3 percent commission; Carrollton, Bloomfield, and Lebanon: 25 cents per 100 pounds and 3 percent commission.
	Fire-cured	22	Hopkinsville: 45 cents per 100 pounds and 3 percent of gross sales.
	Fire-cured	23	Mayfield, Murray, and Paducah: 40 cents per 100 pounds and 3 percent of gross sales; $2\frac{1}{2}$ cents per 100 pounds for insurance.
	One Sucker	35	Mayfield: 40 cents per 100 pounds and 3 percent of gross sales; $2\frac{1}{2}$ cents per 100 pounds insurance; Franklin and Russellville: 50 cents per 100 pounds and 3 percent of gross sales.
	Green River	36	Henderson, Madisonville, and Owensboro: 30 cents per 100 pounds and 4 percent of gross sales, with a minimum charge of 50 cents per 100 pounds.
Maryland 4/	Maryland	32	25 cents per pile up to 100 pounds and 35 cents per pile over 100 pounds; $2\frac{1}{2}$ percent commission on gross sales.
Missouri	Burley	31	Weston: 25 cents per 100 pounds and 3 percent commission.
North Carolina 2/	Flue-cured	11-13	For auction fees, 15 cents on all piles of 100 pounds or less, and 25 cents on all piles over 100 pounds. For weighing and handling, 10 cents per pile for all piles of less than 100 pounds, for all piles over 100 pounds at the rate of 10 cents per 100 pounds; for commissions on the gross sales of leaf tobacco in said warehouses not to exceed $2\frac{1}{2}$ percent.
	Burley	31	Asheville and Boone: 25 cents per 100 pounds and 4 percent commission.
Ohio	Burley	31	Ripley: 25 cents per 100 pounds and 3 percent commission, or minimum of 85 cents per 100 pounds, whichever is greater.
South Carolina 2/	Flue-cured	13	For auction fees, 15 cents on all piles of 100 pounds or less, and 25 cents on all piles over 100 pounds. For weighing and handling, 10 cents per pile for all piles of less than 100 pounds, and 10 cents for each additional 100 pounds; for commissions on the gross sales of leaf tobacco in said warehouses not to exceed $2\frac{1}{2}$ percent.

See footnotes at end of table.

Continued -

Table 12.- Stocks of leaf tobacco, by types as reported and on a converted weight basis, owned by dealers and manufacturers in the United States, quarterly, 1941-45 1/ - Cont'd.

- 1/ For factors used in converting various weights, see table 13. For earlier data and for more detailed information on weight losses, see U. S. Department of Agriculture Circular 435, Tobacco Shrinkages and Losses in Weight in Handling and Storage, issued in July 1937.
- 2/ Subject to revision.
- 3/ From April 1, 1940, through January 1, 1945, a factor of 1.11 was used for converting stocks on unstemmed basis to farm-sales-weight equivalent. Beginning April 1, 1945, this factor was changed to 1.12.
- 4/ Figures are sums of Types 42, 43, and 44, computed separately.
- 5/ Figures are sums of stocks in continental United States and Puerto Rico, computed separately.
- 6/ Formerly Type 45, a filler type. The years 1936 through 1939 represent the period during which occurred the transition from filler to binder.

Table 13.- Conversion factors for adjusting for losses in weight incident to stemming, handling, sweating, and drying, all types of tobacco

Type	U.S. type number	Factors to multiply by to convert various weights			
		Stemmed to unstemmed	Unstemmed stocks To farm-sales weight	To processing weight	Unstemmed processing to stemmed processing
Flue-cured	11-14	1.282	1.12	0.99	0.78
Virginia fire-cured	21	1.299	1.18	.98	.77
Tennessee and Kentucky fire-cured	22	1.316	1.04	.95	.76
Kentucky and Tennessee fire-cured	23	1.316	1.04	.95	.76
Henderson Stemming	24	1.316	1.125	.96	.76
Burley	31	1.351	<u>1/</u> 1.12	.965	.74

Ohio combined	42-44	1.390	1.124	.89	.72
Puerto Rican	46	1.275	1.17	.96	.785
Connecticut Broadleaf	51	1.292	1.07	.87	.775
Connecticut Havana Seed	52	1.299	1.07	.87	.77
New York and Pennsylvania Havana Seed	53	1.364	1.135	.905	.735
Southern Wisconsin	54	1.300	1.06	.82	.77
Northern Wisconsin	55	1.333	1.085	.86	.75
Georgia and Florida sun-grown	56	1.275	1.245	.94	.785
Connecticut shade-grown	61	1.224	1.135	.94	.815
Georgia and Florida shade-grown	62	1.205	1.16	.935	.83

- 1/ Beginning April 1, 1940, factor changed from 1.12 to 1.11 to take into account lower redrying losses. However, due to higher redrying losses in the 1941 crop, factor reestablished at 1.12 beginning April 1, 1945.

1945 ^{2/}	1,257	1,675	143	1,818	1,982

^{1/} A tentative factor of 1.333 was used for converting stemmed stocks to unstemmed equivalent; and a tentative factor of 1.09 was used for converting stocks on unstemmed basis to farm-sales-weight equivalent. Factors for converting to unstemmed processing weight and stemmed processing weight have not been established.

^{2/} Subject to revision.

^{3/} Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.

^{4/} Figures are sums of Types 71, 72, and 73, computed separately.

Table 15.- Stocks of foreign-grown cigar-leaf, cigarette, and smoking tobacco, by types, as reported and on a converted weight basis, owned by dealers and manufacturers in the United States, quarterly, 1941-45 1/

1/ Stocks of foreign-grown tobacco are not converted to farm-sales weight but are shown on an import weight basis. However, for comparability, stemmed stocks have been converted to unstemmed equivalent, and for this purpose a tentative factor of 1.205 was used.

2/ Subject to revision.

3/ Stocks owned by Netherlands Indies Produce Corporation and held in the free trade zone are not included.

4/ Figures are sums of Types 81, 82, 83, and 84.

1/ Subject to revision.

2/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.

1942 ... :	3.6	4.7	8.3	3.6	104.0	::	1945 4/ :	3.6	4.5	8.1		

1/ Stocks as of July 1 and disappearance beginning July 1.

2/ Stocks shown represent those held by dealers and manufacturers who are required by law to file quarterly reports. Farm-sales weight is calculated by converting stemmed to unstemmed and storage weight to farm-sales weight, by allowing for normal losses of dirt, sand, moisture, and stem in handling and preparing tobacco.

3/ Beginning April 1, 1943, a change in the method of reporting Commodity Credit Corporation stocks was adopted, and due to this change, stocks, supply, and disappearance figures after this date are not exactly comparable with those of previous years in which Commodity holdings were included. For a detailed explanation of the change in reporting procedure, see the quarterly stocks report for April 1, 1943, and for a description of the application of these changes in relation to supply and disappearance, see the Flue-cured Market Review, issued March 1944. Flue-cured constitutes the bulk of tobacco purchased under agreement with the Commodity Credit Corporation.

4/ Preliminary.

5/ Stocks as of January 1 of year following production, and disappearance beginning January 1 of year following production.

6/ Production (for the crop year beginning July) and price compiled from Annual Reports of the Governor of Puerto Rico, and estimates of commodity specialists. Stocks are as of January 1 and disappearance beginning January 1 in the crop year, and include stocks held by dealers and manufacturers both in the United States and on the Island of Puerto Rico. Prices are preliminary.

Table 21.-Per capita consumption of tobacco products in the United States, 1940-44 1/

Calendar	Large	Small	Cigars	Cigarettes	Chewing	Smoking	Snuff	Total
year	cigars	cigarettes	2/	2/	tobacco 3/	tobacco 3/	Pounds	Pounds
	Number	Number	Pounds	Pounds	Pounds	Pounds	Pounds	Pounds
1940	42.2	1,369.2	1.02	3.88	0.76	1.54	0.29	7.49
1941 4/...	44.7	1,549.8	1.09	4.46	.78	1.46	.30	8.09
1942 4/...	46.1	1,751.4	1.11	5.13	.82	1.26	.31	8.63
1943 4/...	38.3	1,888.3	.94	5.50	.82	1.10	.32	8.68
1944 4/...	34.7	1,732.7	.87	4.92	.86	.96	.30	7.91

1/ Revised per capita consumption of tobacco products for earlier years is published in the Annual Report on Tobacco Statistics, 1942, table 26.

2/ Pounds of cigars and cigarettes represent unstemmed equivalent of tobacco used in the manufacture of these products. Both large and small cigars and large and small cigarettes are included.

3/ Tax-paid withdrawals of manufactured tobacco have been separated into chewing tobacco and smoking tobacco in proportion to production of these two products.

4/ Preliminary. These years are not strictly comparable with earlier years as products withdrawn tax-free, principally to meet military requirements abroad, are not included, and total population of the United States - including the American forces in foreign countries - has been used in determining per capita consumption.

Compiled from tax-paid withdrawals in the United States (including tax-paid withdrawals of tobacco products from the Philippine Islands and Puerto Rico) reported in monthly statements by the Commissioner of Internal Revenue, and July population estimates of the Bureau of the Census.

Table 22.-Leaf tobacco used in the manufacture of cigars, cigarettes, and tobacco and snuff in the United States, 1935-44 1/

Year	Cigars		Cigarettes		Tobacco and snuff	Total
	Large	Small	Large	Small		
	1,000 lb.	1,000 lb.	1,000 lb.	1,000 lb.	1,000 lb.	
1935	113,066	676	14	399,444	262,732	775,932
1936	125,875	703	12	453,315	267,462	847,367
1937	127,830	773	19	479,943	264,309	872,924
1938	118,162	590	14	483,826	262,710	865,302
1939	122,072	609	25	509,108	253,485	885,299
1940	126,309	526	14	535,204	260,663	922,716
1941	135,494	572	10	626,832	246,177	1,009,085
1942	140,154	525	15	754,535	235,836	1,131,065
1943	131,402	494	42	860,416	236,349	1,228,703
1944	129,399	483	273	920,145	204,241	1,254,541

1/ The quantities given are unstemmed processing-weight equivalent of all kinds of tobacco used. Stemmed leaf and scraps, etc., used in manufacturing have been converted to unstemmed equivalent at the ratio of 3 pounds stemmed to 4 pounds unstemmed.

2/ Does not include tobacco used in bonded manufacturing warehouses.

Compiled from annual reports of the Commissioner of Internal Revenue.

See footnotes at end of table.

Continued -

1/ For rates of Federal tax on tobacco products, see table 26. Classification of large cigars and rate of tax were changed, effective November 1, 1942. Under the old rate, the 2 classes, A and B, included those cigars selling for not more than 8 cents, while the new rate divided cigars within this price range into 4 classes, A, B, C, and D. The old classifications C, D, and E, correspond respectively to the new E, F, and G. Figures are not strictly comparable with those of previous years as tax-free products for the use of armed forces at sea and overseas are not included.

2/ Totals do not agree with totals published in the Annual Report of the Commissioner of Internal Revenue because revisions were not made in the monthly data. In no case is the discrepancy significant.

Compiled from reports of the Commissioner of Internal Revenue.

Table 26.-Rates of Federal tax on tobacco products in the United States, as imposed by the Internal Revenue Acts of 1926 and 1942

Under Internal Revenue Act of 1926 1/		Under Internal Revenue Act of 1942 2/	
Product	Rate of tax	Product	Rate of tax
Cigars weighing more than 3 pounds per 1,000, retailing for -		Cigars weighing more than 3 pounds per 1,000, retailing for -	
(A) 5 cents each or less ..	\$ 2.00 per thousand	(A) 2½ cents each or less ..	\$ 2.50 per thousand
(B) More than 5 and not more than 8 cents each ..	\$ 3.00 per thousand	(B) More than 2½ and not more than 4 cents each ..	\$ 3.00 per thousand
(C) More than 8 and not more than 15 cents each ..	\$ 5.00 per thousand	(C) More than 4 and not more than 6 cents each ..	\$ 4.00 per thousand
(D) More than 15 and not more than 20 cents each ..	\$10.50 per thousand	(D) More than 6 and not more than 8 cents each ..	\$ 7.00 per thousand
(E) More than 20 cents each ..	\$13.50 per thousand	(E) More than 8 and not more than 15 cents each ..	\$10.00 per thousand
Weighting not more than 3 pounds per 1,000 ..	\$.75 per thousand	(F) More than 15 and not more than 20 cents each ..	\$15.00 per thousand
Cigarettes weighing more than 3 pounds per 1,000 ..	\$ 7.80 per thousand 3/ 4/	(G) More than 20 cents each ..	\$20.00 per thousand
Weighting not more than 3 pounds per 1,000 ..	\$ 3.25 per thousand 4/	Weighting not more than 3 pounds per 1,000 ..	\$.75 per thousand
Papers ..	cent for each 50 or fraction thereof	Cigarettes weighing more than 3 pounds per 1,000 ..	\$ 8.40 per thousand 3/
Tubes ..	1 cent for each 50 or fraction thereof	Weighting not more than 3 pounds per 1,000 ..	\$ 3.50 per thousand
Smoking and chewing tobacco and snuff ...	18 cents per pound	Papers ..	cent for each 50 or fraction thereof
1/ As imposed by the Internal Revenue Act of February 26, 1926.		Tubes ..	1 cent for each 50 or fraction thereof
2/ As imposed by the Internal Revenue Act, effective November 1, 1942.		Smoking and chewing tobacco and snuff ..	18 cents per pound

3/ Cigarettes weighing more than 3 pounds per 1,000 which are more than 6½ inches in length are taxable at the rate imposed on cigarettes weighing less than 3 pounds per 1,000, counting each 2-3/4 inches or fraction thereof of the length of each as one cigarette. This provision was first imposed by the Revenue Act of May 10, 1934, amending the Revenue Act of February 26, 1926.

4/ Rate effective July 1, 1940, changed tax on large cigarettes from \$7.20 to \$7.80, and on small cigarettes from \$3.00 to \$3.25.

Compiled from internal revenue laws of the United States.

1/ The export statistics in this table are on the basis of crop years. Crop years are as follows: Flue-cured, year beginning July; Maryland, year beginning January of year following production; all other types, year beginning October. These figures do not include shipments to Puerto Rico; no shipments were made to Alaska and Hawaii.

2/ Preliminary. 3/ Includes Hong Kong and Kwantung. 4/ Beginning May 6, 1938, the United States trade with Germany includes Austria; for comparable figures in earlier years add Austria and Germany.

5/ Exclusive of Algeria, Tunisia and Madagascar. 6/ Includes Gold Coast, Nigeria, and other British West Africa. 7/ Includes Canary Islands. 8/ Maryland type 32, January-September only.

9/ Includes Eastern Ohio, type 71. 10/ Includes 395,000 pounds to Switzerland.

11/ Includes 509,000 pounds to Sweden. 12/ Black Fat, Water Baler, and Dark African are composed principally of fire-cured and One Sucker tobacco, which have been treated with oils and greases, packed in boxes, bales, and tierces, and subjected to heavy pressure. Approximate percentages are two-thirds One Sucker and one-third fire-cured. In some cases a small amount of flue-cured might be substituted for that portion of one of the other types.

13/ Exclusive of Mozambique. 14/ Exclusive of Bermuda, Barbados, Jamaica, Trinidad and Tobago.

15/ Includes 168,000 pounds to Switzerland.

Bureau of Agricultural Economics. Compiled from Monthly Summary of Foreign Commerce of the United States and official records of the Bureau of the Census. Export weight.

^{1/} Prices were obtained from approximately 4 dealers in each of 32 large cities as of the 15th of the month, for the brand and/or package size most in demand in their stores, and have been weighted by population of the metropolitan areas and of adjacent areas, where the retail prices were obtained. Sales taxes are included wherever applicable.

^{2/} Representing an average of cigars selling for 5 cents or less.

^{3/} Pricing of cigarette tobacco and plug discontinued after March 1939.

Compiled from reports and official records of the Bureau of Labor Statistics, Department of Labor.

1/ Tobacco imported from the Philippine Islands is free of duty except that imports of the following items from the Philippines after December 31, 1939, in excess of the specified quotas shall pay the duty applicable to imports from countries other than Cuba: - Original quotas are for the calendar year 1940 and for each calendar year thereafter through the calendar year 1945, each of said quotas shall be the same as the corresponding quota for the immediately preceding calendar year, less 5 per centum of the corresponding original quota. The original quota for cigars (exclusive of cigarettes, cheroots and paper cigars and cigarettes including wrappers) two hundred million cigars. The original quota for scrap tobacco, and stemmed and unstemmed filler tobacco described in paragraph 602 of the Tariff Act of 1930, four million five hundred thousand pounds. For the period January 1, 1946, through July 3, 1946, each of said quotas shall be one-half of the corresponding quota specified for the calendar year 1945.

2/ Rates are as of November 1, 1944.

Continued -

Table 40.-Tariff rates on tobacco and tobacco products imported into the United States; established by the Tariff Act of 1930, and subsequent changes - Cont'd.

- 3/ This rate was established by the Netherlands Trade Agreement, which became effective February 1, 1936. From that date until June 30, 1936, the rate on unstemmed wrapper tobacco was \$1.875, and on stemmed wrapper tobacco, \$2.525. The present reduced rates on this tobacco have been in effect since July 1, 1936.
- 4/ The rate was reduced under the Trade Agreement with Turkey, effective May 5, 1939.
- 5/ The rate was reduced under the Trade Agreement with the United Kingdom, effective January 1, 1939.
- 6/ Under the treaty of commercial reciprocity concluded between the United States and Cuba in 1902, which is continued in effect by section 316 of the Tariff Act of 1930, imports of Cuban tobacco into the United States are entitled to a reduction of 20 percent from the prevailing rate paid by any other country. The only exception to this rule was the Cuban Trade Agreement of September 3, 1934, which established specific rates for certain classes of tobacco; the tobacco concessions of this agreement were terminated March 16, 1936. The rates above listed for tobacco from Cuba have been computed by applying the 20 percent preferential reduction first to the rates established in the Tariff Act of 1930, and, for the present rate, to the reduced rates granted by existing Trade Agreements with other countries.
- 7/ The Trade Agreement with Cuba, effective September 3, 1934, reduced the rate on unstemmed wrapper tobacco from Cuba to \$1.50 per pound and provided that total imports of tobacco and tobacco products from Cuba in any calendar year could not exceed 18 percent of the total quantity (unstemmed equivalent) of tobacco used in the manufacture of cigars in the United States during the preceding calendar year. These rates and provisions were terminated on March 16, 1936, by the termination of the domestic cigar-tobacco adjustment program. From March 17 to June 30, 1936, the rate remained at \$1.50 which was 20 percent less than the general rate of \$1.875 established by the Netherlands Trade Agreement. Beginning July 1, 1936, the Netherlands Trade Agreement lowered the general rate to \$1.50 thus reducing the Cuban rate to \$1.20. This Cuban rate was unchanged by the First Supplementary Cuban Agreement, effective December 23, 1939, but was reduced to \$0.91 by the Second Supplementary Cuban Agreement, effective January 5, 1942.
- 8/ Under the Netherlands Trade Agreement effective February 1, 1936, the general rate on stemmed wrapper tobacco was reduced to \$2.525 per pound and the Cuban rate was 20 percent less or \$2.02 per pound. Under the same agreement, beginning July 1, 1936, the general rate was reduced to \$2.15 per pound and the Cuban rate was therefore \$1.72.
- 9/ Reduced as a result of the Trade Agreement with Turkey, effective May 5, 1939, in which the general rate on unstemmed cigarette leaf, n.s.p.f. became 30 cents per pound.
- 10/ Under the Cuban Agreement, from September 3, 1934, to March 16, 1936, the rate on unstemmed filler tobacco (including cigarette leaf n.s.p.f.) was set at 17-1/2 cents per pound, and on stemmed filler tobacco at 25 cents per pound; total imports of Cuban tobacco and tobacco products during this period were subject to a quota of 18 percent of tobacco used in manufacture of cigars in the United States during the preceding year. With the termination of tobacco concessions in the Cuban Agreement, the rates returned to the 1930 Tariff Act level. The Supplemental Cuban agreement, effective December 23, 1939, restored the rates of the original Cuban Agreement on filler tobacco but confined these reduced rates to filler tobacco, other than cigarette leaf stemmed and unstemmed. The First Supplemental Cuban agreement limited the application of the reduced rates on stemmed or unstemmed filler tobacco (other than cigarette leaf) and scrap tobacco to a total quantity of 22,000,000 pounds (unstemmed equivalent) in any calendar year, imports in excess of this quantity becoming subject to duty as if not mentioned in the Supplemental Agreement but not to rates higher than those in effect just prior to the original Cuban agreement. The Second Supplemental Cuban Agreement, effective January 5, 1942, reduced the rate on filler tobacco other than cigarette leaf unstemmed to 14 cents, and stemmed to 20 cents and continued the quota on scrap and filler tobacco.
- 11/ Under the Cuban Trade Agreement, from September 3, 1934, to March 16, 1936, the rate on scrap tobacco was set at 17-1/2 cents per pound, and on cigars and cheroots of all kinds at \$2.25 per pound plus 12-1/2 percent ad valorem; total imports of Cuban tobacco and tobacco products during this period were subject to a quota of 18 percent of tobacco used in manufacture of cigars in the United States during the preceding year. With the termination of tobacco concessions in the Cuban Agreement, the rates returned to the 1930 Tariff Act level. The First Supplemental Cuban Agreement restored these rates to their level under the original Cuban agreement and established the quota on scrap and filler tobacco described in footnote 10/. The Second Supplementary Cuban Trade Agreement, effective January 5, 1942, reduced the rate on scrap tobacco from Cuba to 14 cents per pound; and on cigars and cheroots from Cuba to \$1.80 plus 10 percent ad valorem.
- 12/ Under the Cuban Trade Agreement, from September 3, 1934, to March 16, 1936, the rate on cigarettes was set at \$2.25 cents per pound plus 12-1/2 percent ad valorem, with a quota limit on total imports of tobacco and tobacco products from Cuba of 18 percent of tobacco used in manufacture of cigars in the United States during the preceding year. With the termination of the tobacco concessions in the Cuban Agreement on March 16, 1936, this rate returned to the 1930 Tariff Act level. The Trade Agreement with the United Kingdom, effective January 1, 1939, reduced the general rate on cigarettes to \$2.25 cents per pound plus 12-1/2 percent ad valorem, and the present Cuban rate is 20 percent less.

Bureau of Agricultural Economics. Compiled from the Tariff Act of 1930, trade agreements, and other official sources.
